

RAZR + Hospital Quality Improvement Letter of Intent

Dear Quality and Safety Hospital Advocates and Colleagues,

In June, the Centers for Medicare and Medicaid Services (CMS) published a request for proposal for a new Hospital Quality Improvement Initiative targeting rural and low performing hospitals. This initiative integrates the strengths of the Hospital Improvement Innovation Network and Quality Innovation and supports the ongoing efforts related to COVID-19. RAZR Solutions has been a part of each of CMS Hospital Quality Improvement programs since their inception in 2014. We have worked with hundreds of hospitals and have helped our hospitals achieve and sustain each of the goals associated with the program.

RAZR invites you to partner with us for the Hospital Quality Improvement Contract. On our website www.RAZRSolutions.com/enrollment we have provided additional information and Frequently Asked Questions (FAQ) documents to help you familiarize yourself with the initiative, its goals and objectives and how RAZR is equipped to assist and support our hospitals who have been dedicated to quality and safety and continual improvement for their patients, families and community.

Please send any additional questions or information requests to hgic@razrsolutions.com.

Thank you, in advance, for your consideration and enrollment in this initiative,

A handwritten signature in cursive script that reads "Joan Crandall".

Joan Crandall, MS, PMP
Founder, Chief Operating Officer
RAZR Solutions, LLC
CVE SDVOSB, SBA HUBZone

Non-Binding Letter of Intent/Participation:

 (Name of Hospital/System) is committed to participating in HQIC with RAZR upon award of this contract.

We know quality and safety in patient care is our primary objective and understand hospital leadership support is imperative for each HQIC areas:

Improving Behavioral Health Outcomes with a specialized focus on opioid stewardship

Increasing Patient Safety and Quality focused on reduction of harm

Strengthening Care Transitions and reduce readmissions

Providing Support for Public Health Emergencies during Covid-19 and other crises as they may arise

Enhancing Patient Centered Care and Relationships with our patients, their families, communities and community organizations

Elevating Quality Improvement efforts by promoting advanced professional development and continuing and consistently reporting accurate data

Our target audiences, will be in accordance with the CMS' identification of vulnerable populations, including but not limited to:

- The elderly
- The medically underserved
- The chronically ill and disabled
- The low-income and/or homeless
